## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-16 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter.

Claims 1 and 15 recite, inter alia, controlling transfer of data through a DMA datapath in response to parameters contained in at least one DMA descriptor containing a next descriptor pointer, wherein "the next descriptor pointer is selected from (1) none, which indicates descriptor array mode, (2) half of the next descriptor pointer, which indicates small descriptor list mode, and (3) all of the next descriptor pointer, which indicates large descriptor list mode". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation. Examiner notes that although prior art discloses next descriptor pointers, it does not disclose such pointers having three programmable modes as described.
